

# NP Script Online Supplement Store

We try to carry as many products as possible at my office but it is difficult to keep everything in stock and to always have certain "specialty" products available. So, utilizing the NP Script web site is a great option for those products or for those who may be unable to make it into the office for whatever reason.

There are over 12,000 products on the site and I have carefully reviewed them for what I feel are the best products for each condition or region based on their ingredients and cost effectiveness. This will keep you from having to search all of the products yourself. I have listed them on the form below including the condition or region that they are used for, a brief description of the product, it's name, approximate price (after your 10% discount) and the name of the company which produces it. This list is constantly evolving so feel free to make suggestions as to additional products that you might like to see. There are many more quality products on the site including Personal Care Products and Animal Care so feel free to explore. To find a particular product, just type the *exact* name in the search box and hit enter. If more than one product shows up, use the company name to narrow your search.

These recommendations are just for reference and are certainly not meant for use to diagnose or treat any condition. I highly recommend having a nutritional consultation prior to beginning any new vitamin, supplement or herbal regimen. If you have any questions regarding a product or condition, I would be happy to speak with you. For general questions you can email me or for more extensive needs you can call the office to schedule an appointment.

This is free and there are no minimum orders or memberships and this is not a multi-level marketing program. If you have not previously used the NP Script site, you will need to create a login account. If you are interested in doing so, please follow the directions below:

- Go to <http://npscript.com>
- In the "New Patient " box, Enter the code "Timko" (capitalization matters), and click "GO"
- Fill in the remainder of the information including your email and password and click "Sign Up"

For questions, concerns or to schedule an appointment, please use the following contact information:

Over 2300 years ago, Herophilus, a Greek Physician stated, "When health is absent, wisdom cannot reveal itself, art cannot manifest, strength cannot fight, wealth becomes useless, and intelligence cannot be applied." That statement is just as true now as it was then. Please make sure you are taking good care of yourself and your family and spread the word of good health through eating healthy, supplementation and chiropractic to all you know. God Bless.

Yours in Health,  
Dr. Scott Timko
